### AMENDMENTS

27. (currently amended) A method of enhancing the delivery of oil-soluble skin care actives into the skin comprising applying to the skin of a mammal in need of treatment, a safe and effective amount of a water-in-oil composition comprising:
- a) an oil soluble skin care active selected from the group consisting of terpene alcohols, oil-soluble phytosterols, oil-soluble anti-acne actives, oil-soluble beta-hydroxy acids, oil-soluble vitamin B<sub>3</sub> compounds, oil-soluble retinoids, oil-soluble anti-oxidants, oil-soluble radical scavengers, oil-soluble chelators, oil-soluble flavonoids, oil-soluble anti-inflammatory agents, oil-soluble anti-cellulite agents, oil-soluble topical anesthetics, and mixtures thereof;
  - b) a silicone oil; and
  - c) a silicone elastomer.
28. A method of enhancing the delivery of oil soluble skin care actives into the skin according to claim 27 wherein the composition's oil continuous phase comprises:
- a) an oil soluble skin care active selected from the group consisting of terpene alcohols, oil-soluble phytosterols, oil-soluble anti-acne actives, oil-soluble beta-hydroxy acids, oil-soluble vitamin B<sub>3</sub> compounds, oil-soluble retinoids, oil-soluble anti-oxidants, oil-soluble radical scavengers, oil-soluble chelators, oil-soluble flavonoids, oil-soluble anti-inflammatory agents, oil-soluble anti-cellulite agents, oil-soluble topical anesthetics, and mixtures thereof;
  - b) a silicone oil; and
  - c) a silicone elastomer.
29. (currently amended) A method of enhancing the delivery of oil soluble skin care actives into the skin from the oil phase of a topical water-in-oil emulsion composition comprising, applying said topical composition to the skin, said topical composition's oil phase comprising:
- a) a silicone elastomer; and
  - b) an oil soluble skin care active selected from the group consisting of terpene alcohols, oil-soluble phytosterols, oil-soluble anti-acne actives, oil-soluble beta-hydroxy acids, oil-soluble vitamin B<sub>3</sub> compounds, oil-soluble retinoids, oil-soluble anti-oxidants, oil-soluble radical scavengers, oil-soluble chelators, oil-

soluble flavonoids, oil-soluble anti-inflammatory agents, oil-soluble anti-cellulite agents, oil-soluble topical anesthetics, and mixtures thereof

30. (currently amended) A method of regulating the condition of skin, said method comprising the step of topically applying to the skin of mammal in need of treatment, a safe and effective amount of the composition comprising an oil continuous phase and an aqueous discontinuous phase wherein the oil phase comprises:

- a) an oil soluble skin care active selected from the group consisting of terpene alcohols, oil-soluble phytosterols, oil-soluble anti-acne actives, oil-soluble beta-hydroxy acids, oil-soluble vitamin B<sub>3</sub> compounds, oil-soluble retinoids, oil-soluble anti-oxidants, oil-soluble radical scavengers, oil-soluble chelators, oil-soluble flavonoids, oil-soluble anti-inflammatory agents, oil-soluble anti-cellulite agents, oil-soluble topical anesthetics, and mixtures thereof;
- b) a silicone oil; and
- c) a silicone elastomer.

31. (currently amended) The method according to claim 30 wherein the composition comprises an oil continuous phase and an aqueous discontinuous phase, wherein the oil phase comprises [an oil soluble skin care active];

- a) an oil soluble skin care active selected from the group consisting of terpene alcohols, oil-soluble phytosterols, oil-soluble anti-acne actives, oil-soluble beta-hydroxy acids, oil-soluble vitamin B<sub>3</sub> compounds, oil-soluble retinoids, oil-soluble anti-oxidants, oil-soluble radical scavengers, oil-soluble chelators, oil-soluble flavonoids, oil-soluble anti-inflammatory agents, oil-soluble anti-cellulite agents, oil-soluble topical anesthetics, and mixtures thereof;
- b) a silicone oil; and
- c) a silicone elastomer.
